

LAFARGE MAGNOLIA® DARK AND ULTRA DARK MASONRY CEMENT

bringing materials to *life*™

Rich, natural colors
to enhance commercial and
residential structures

Lafarge Magnolia Dark and Ultra Dark Masonry Cement

The color for these Lafarge masonry cements is derived from the basic ingredients used in our manufacturing process. The shades are uniform, stable and very easy to clean. Both color masonry cements offer the excellent working characteristics of our Lafarge Magnolia Masonry Cement – from superior board life and yield, to great workability and durability. These rich natural colors are designed to enhance commercial and residential structures, and each product meets the applicable ASTM specifications.

Lafarge Magnolia® Dark and Ultra Dark Masonry Cement

Precautions

Direct contact with wet cement should be avoided. If contact occurs, the skin should be washed with water as soon as possible. Exposure can cause serious, potentially irreversible tissue destruction in the form of chemical (caustic) burns. If cement gets into the eyes, immediately rinse thoroughly with water and seek medical attention. For more information, reference the applicable Lafarge Material Safety Data Sheet (MSDS). The MSDS should be consulted prior to use of this product and is available upon request and online at www.lafarge-na.com.

Limited Warranty

Lafarge warrants that Lafarge Magnolia Dark and Ultra Dark Type N Masonry Cement meets the requirements of ASTM C 91. Lafarge makes no other warranty, whether of merchantability or fitness for a particular purpose, with respect to Magnolia Dark or Ultra Dark Type N Masonry Cement. Having no control over its use, Lafarge will not guarantee finished work in which Magnolia Dark or Ultra Dark Type N Masonry Cement is used.

Product Description

Basic Use: These masonry cements are specially formulated and manufactured to produce dark grey and ultra dark grey colors without the further addition of color pigments. They are specially designed for use with brick.

Types: Produced in Type N strength level for use in preparation of ASTM specification C 270 Type N mortar, without further addition of portland cement or hydrated lime.

Technical Data

Applicable Standard: These masonry cements conform to ASTM C 91, *The Standard Specification for Masonry Cement*. Each product produces a Type N mortar as outlined in either the property or proportion specification requirement of ASTM C 270, when properly mixed with mason's sand and clean, potable water.

Limitations

Colors of these masonry cements are by design produced without the use of pigments. They should be mixed with sand and clean water to produce a masonry mortar without the further addition of portland cement or hydrated lime and are not recommended for stucco.
