

Ultra™ series

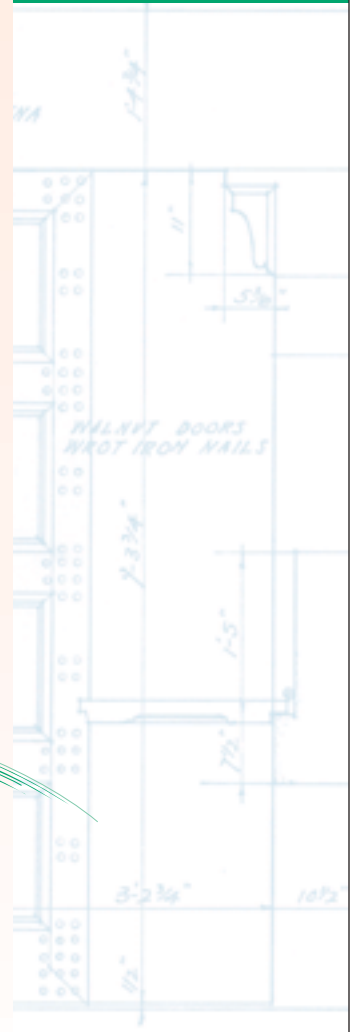

Use what the pros use!

From the world leader in construction materials comes a family of concrete mixes specifically designed to give you more profitability through increased productivity.

- **Ultra** —
Your cost-effective
concrete solution

LAFARGE

UltraHorizontal™

Challenge

To achieve better looking floors with less effort

Solution

Better technical properties in both plastic and hardened states:

- Easier placement
- Improved finishability
- Reduced shrinkage

UltraDrive™

Challenge

To meet the need for a more durable, easier to place driveway

Solution

Better technical properties in both plastic and hardened states:

- Better placability
- Durability — freeze thaw resistant, wear resistant
- Strength

UltraVertical™

Challenge

To meet the demands for consistent good-looking as-stripped walls requiring less patching and rubbing

Solution

Better technical properties in both the plastic and hardened states:

- Less effort to place and strip
- Surfaces — more uniform texture

UltraCurb™

Optimized for machine and hand curb installation; gives good early strengths and improved productivity:

- Good surface appearance; durable

Also available:

UltraTilt™

UltraStreet™

UltraFooting™

UltraPatio™

All mixes available with:

Fiber Plus (synthetic or steel fibers)

RS (reduced shrinkage)

RP (reduced permeability)

Flow (high plasticity)

Quick Strip (higher early strengths for walls / columns)

Quick Set (reduced setting time)

Delay Set (retarded setting time)

Low Heat (reduced hydration peak)

HS (high strength — 8000+ PSI / 55 MPa)

HES (high early strength)

Color
