

UltraHorizontal™

Use what the pros use!

Improve your productivity with Lafarge UltraHorizontal — superior placability and a better finished surface. Your finishers will love it!

- Controlled set times (accelerated, retarded, or normal available)
- Reduced potential for cracking
- Reduced potential for curling
- Synthetic or steel fibers available
- Easier pumping (less slump loss)
- Flatter floors ... every time

**Increased productivity —
save money and get more done
at your site every day!**

Lafarge
UltraHorizontal™

Applications:

- Commercial and industrial floors
- Basement floors, garage floors, etc.
- Slabs

Technical:

Lafarge UltraHorizontal is available in a wide range of strengths, slumps and air contents to meet your local requirements

Available with:

- Fiber Plus (synthetic or steel)
- RS (reduced shrinkage)
- RP (reduced permeability)
- Flow (high plasticity/flowability)
- Quick Set (accelerated setting time)
- Delay Set (retarded)
- Low heat (lower exothermic peak)
- HS (high strength - 8000+ PSI/55 MPa)
- HES (high early strength)
- Color
